What's Up With Women and Money?

How to do all the financial stuff you've been avoiding

By Alison Kosik

Former CNN/CNN International Anchor and Business Correspondent Alison Kosik found herself trapped in a failing marriage. The savvy mother of two, was terrified to leave her husband. Why? The Behaviour Portfolio

Managing portfolios and investor behavior in a complex economy

By Phillip Toews

Investment advisors face two challenges. First, the portfolios leave investors vulnerable to severe economic events and emotional stress. Second, the way that investors are educated about their portfolios isn't effective at helping them curb biases. *The Behavioral Portfolio* examines the risks of both stock and bond portfolios from historically comprehensive perspective to help illustrate that, based on market history, the current approach could lead to a break-down of clients' portfolios and practices. It then lays out an all-seasons approach for investing that both embraces optimism and addresses contingencies of significant risk events.

Once portfolios are built according to these new parameters, portfolio communications are shifted to pro-actively prepare investors for challenges ahead. Instead of following the crowd and shifting out of assets at unfavorable time, investors are trained to both understand the markets and to think counter-intuitively. Behavioral portfolios and communications allows investors to enjoy a higher probability of success and greater peace of mind throughout their investing lives.

The Pro Retail Trader

How to generate professional-level returns as a retail trader

By Steve Ruffley

A guide to how retail traders can trade like the professionals from someone who has actually done it. *The Pro Retail Trader* bridges the gap between the professional world of trading in which the author, Steve Ruffley, was trained and that of retail where he now places these kinds of trades.

Ruffley has spent decades perfecting ways of making the largest amounts of money he can, from the least amounts of time day trading. This translates to numbers like, \$10k in 2 minutes, \$77k in 2 hours and \$90K in 1 day. Like the professionals he only trades to make money, to make \$1000s and classes himself as a Pro retail trader. Making 'Pro' level trader amounts, but doing this trading with a retail broker. This is important because anyone can be a retail trader, not everyone can be a 'Pro' trader. You can be taught how to trade but not everyone can learn how to make money, real money, from trading.

Steve Ruffley has been involved in the finance industry for nearly 25 years. "If it's trading, then I've done it," is still one of his favourite sayings. From risk managing pro traders to running a trading floor, Steve has worked with some of the best traders in the business, at the largest trading firms. He has seen insights to Pro trading that few people, even pro traders themselves, ever get to see.

The Uncomfortable Truth About Money

How to live with uncertainty and think for yourself

By Paul Podolsky

We are all stuck in a money cage. Money isn't the most important thing, but it is a thing and you can't get away from it. Birth costs money and death costs money. So even if you hate talking about money, you need to know the basics, the same way you need to know how to cook yourself a simple meal.

The problem with most money books is that they are not written by practitioners and avoid hard truths. What a weathered investor knows is that stocks are not always good for the long run. They know that being stingy helps accrue wealth. They know the big thing when you buy property has nothing to do with the property. They know the big thing is less what happens to the markets in a day than if the entire system holds together. And they know what to look for if it's time to pull out.

This book will teach you a lifetime of money learnings distilled to a thin volume, like a basic cooking recipe you can follow.

Unicorns, Hype and Bubbles

A guide to spotting, avoiding and exploiting investment bubbles in tech

By Jeffrey Funk

New technologies are an investment minefield. Putting money behind them means taking a risk on unproven ventures, often from inexperienced (and potentially unscrupulous) developers. While some will lead the investor to fantastic gains, many others turn out to be mere bubbles – a flimsy veneer of excitement and hype with little profitable at the core.

From cryptocurrencies, blockchain, the metaverse, Web3, and NFTs, to self-driving vehicles, delivery drones, solid state batteries, eVTOLs, and more, technology bubbles have been inflating and popping for many years. Each time a bubble pops, tens if not hundreds of billions of investment dollars disappear with them.

Unicorns, Hype, and Bubbles arms the reader with the tools required to differentiate between bubbles and genuine, sustainable technological revolutionaries.

Cycles

The mysterious forces that trigger events

By Edward R. Dewey with Og Mandino

Edward R. Dewey was chief economist in the Hoover Administration and tasked by President Hoover to figure out what caused the 1929 stock market crash and ensuing depression.

In the course of his extensive investigations, he became convinced that something important was missing from our collective knowledge of how economies and societies work – a working knowledge of cycles. He was joined in his quest to establish a “science of cycles” by other leaders of his time, including Ivy League scientists, Smithsonian Directors, Industrial CEOs, Ambassadors, and political leaders.

This trading classic, now back in print, was first published in 1971. *Cycles* was Dewey’s answer to President Hoover’s question and to many more questions which had arisen from his decades of research.

The Geometry of Wealth

How to shape a life of money and meaning

By Brian Portnoy

How does money figure into a happy life? Behavioral finance expert Brian Portnoy delivers an inspired answer, building on the critical distinction between being rich and being wealthy.

While one is an unsatisfying treadmill, the other is the ability to underwrite a meaningful life, however one chooses to define that. Truly viewed, wealth is funded contentment.

In this accessible and entertaining book, Portnoy reveals that true wealth is achievable for many – including those who despair it is out of reach – but only in the context of a life in which purpose and practice are thoughtfully calibrated.
